  - Questions

Total 7.25 CME Credits

**Learning Objectives:**

1. Discuss with their patient what they can expect during and after the various skin procedures to develop an appropriate informed consent procedure.
2. Review the pertinent factors to formulate and choose a correct plan for biopsy, excision, revision, and closure before the procedure is undertaken.
3. Discuss the Basic concepts in wound care including the anatomy of the skin, site preparation, wound healing principles, and appropriate handling of the skin.
4. Be able to select the proper local anesthetic and appropriate suture for wound repair.
5. Practice basic wound repair and more advanced techniques including dog ear repairs, basic approach to advanced plasties, and appropriate use of animal models.
6. Assist other healthcare professionals and be able to offer appropriate approaches to skin surgical dilemmas, emergent and elective.

**Speaker Disclosure:** Dr. LaRavia has no actual or potential conflicts of interest in regard to these topics.
