

## NEW – MUSCULOSKELETAL MEDICINE KSA

No matter what department you are in, MSK issues are some of the most common issues presenting to clinicians. From back pain to knee injuries, this comprehensive review will help you improve your patient care!

Join this interactive group discussion of Musculoskeletal Medicine's best practices and procedures.

**Tuesday November 28 & Wednesday  
November 29, 6pm – 9pm CT**

Co-developed by practicing family, occupational, and sports medicine physicians from Interstate Postgraduate Medical Association (IPMA), the American College of Occupational and Environmental Medicine (ACOEM) and the American Medical Society for Sports Medicine (AMSSM), this ABFM approved, new [Knowledge Skills Assessment \(KSA\)](#) provides family physicians the opportunity to brush up on their knowledge in PRIMARY CARE Musculoskeletal Medicine.
