Integrating Tobacco Treatment into Behavioral Health Care: Panel Presentation & Discussion

Individuals with mental illness and/or a substance abuse disorder smoke at rates **2-3X higher** than the general population.

Join us for a panel presentation to learn evidence-based recommendations to integrate tobacco dependence treatment into routine mental health care and gain insights from peer organizations.

Wednesday, August 19th, 2015

9:30 – 11:30 am

Respiratory Health Association

1440 West Washington Blvd, Chicago

RSVP to Emily at EZadikoff@lungchicago.org or 312-229-6186

For mental health and substance abuse treatment facilities, administrators, clinicians and staff, and those interested in assisting their clients quit smoking
