Addressing and Overcoming Barriers to Vaccine Hesitancy: Positive Messaging for Patients

Presented by: Anton Grasch, MD, Assistant Professor of Family Medicine, UnityPoint Health Methodist Family Medicine, Peoria, IL

Learning Objectives:

1. Educate patients about the importance of being immunized.
2. Identify approaches to overcome barriers associated with vaccine compliance.
3. Learn communication strategies for adult patients and the parents/caregivers of children who require immunization.
4. Develop an office-wide strategy to improve immunization rates (e.g., patient recall and reminder systems, standing orders).
