The Resurrection Family Medicine Residency Program, established over 30 years ago, continues to produce exemplary family docs that serve local Chicago communities and families all over the country.

Being located in one of America's greatest cities, we have the unique opportunity to treat patients of all cultural and socioeconomic backgrounds. This diverse training experience teaches our residents not only the skills necessary to diagnose and treat disease, but how to inspire quality of life in their patients. We value our patients and the opportunity to serve them.

Our Family Medicine Residency Program is a true family, with dedicated faculty and staff

committed to teaching residents and students in a kind, supportive environment.
